

# PBZ® DL

## Fully automated profile machining

### due to integrated material handling system!

Handtmann PBZ® DL

The PBZ® DL with its fully automatic material handling system and machining of the profiles defines the state of the art achievement in productivity. Bigger cross sections up to 320 x 200 mm / 12.5 x 7.8 inches and lengths up to 30 metres / 1180 inches is the domain of the PBZ® DL. Due to the automation and easy programming, an easy assembly of smaller units up to mass-production on the same machining centre is now simple and no longer an obstacle.

#### Convincing advantages:

- Complete, fully automated profile machining due to integrated material handling system
- Economic assembly of smaller units up to mass-production
- Stands out for cross sections up to 320 x 200 mm / 12.5 x 7.8 inches and length up to 30 metres / 1180 inches
- Integrated saw unit in the tool magazine for spatial cuttings
- Additional saw blade provides cross and bevel cuts

Automatically removal of the finished parts
